PROFILE

Fifth-year software engineering student at Epitech, looking for a front-end engineering internship **starting March 2027**. I have shipped production UI in both **React and Angular**: I lead the web client — interface, design system and component layer — of Syntheza, a platform with real users, and built the front end for Appolonia's casino-floor management tools, where a broken screen takes a machine offline. **I care about the parts of front-end work that only show up at scale** — component reuse, cross-platform consistency, and the kind of cross-regional collaboration a three-country remote team forces on you.

EXPERIENCE

Appolonia — Front-end developer, intern
Apr — Aug 2025

Casino floor management systems

- Rebuilt the **KT Updater** module as a component-driven admin panel automating terminal shutdown and locking — production software where a UI mistake takes a slot machine offline.
- Shipped the same feature set across **Angular (web) and Ionic (hybrid mobile)** from one codebase — the closest I have come to true multi-platform front-end work.
- Built an internal email-generation tool from scratch: templating, live preview and send flow.

Angular 13 · Ionic 6 · TypeScript · SOAP/XML APIs · GitLab

ARD — Mobile development intern
2023

NFC access-control software

- Built an Angular application managing **NFC cards** and user profiles for alarm-system installers, from component structure to state.
- Implemented the **card-scanning flow**: a tag read renders the cardholder's information in the UI in real time.
- Owned the interface end to end, from the scan trigger to the profile view, working directly with the installers who used it daily.

Angular · TypeScript · NFC

Intel · AI for Youth — competition
2022

- Computer vision and object recognition in Python with TensorFlow. **2nd place**, team category.

PROJECTS

Syntheza — Lead Frontend Web
2025 — 2026

syntheza.ovh · team of 3, three countries

- Strategic-watch platform that ingests RSS at scale, **deduplicates** what it finds and returns a daily synthesis instead of another feed.
- I own the web client: interface, **design system** and the React **component layer**, kept to a **~330 kB gzipped bundle** despite the scope. Scope was set by a field study of 20 professionals before any code was written.

React 19 · TypeScript · Tailwind · Radix UI · Node · Express · Prisma · PostgreSQL · React Native/Expo

Forge — solo
2026

Open-source · github.com/RaphaelPelerin/forge-asset-generator

- Game-asset generator: a React/Ant Design front end over a **FastAPI** service running SDXL locally, fully offline. **~4,100 lines, 59 tests.**

React 18 · Ant Design · FastAPI · PyTorch · diffusers/SDXL

Keys GPT — solo
2025 — 2026

Open-source · github.com/RaphaelPelerin/keys-gpt

- Describe a part in text and get a playable piano roll and a downloadable MIDI file, part type **inferred from the prompt**.

React · TypeScript · OpenAI API · Web Audio

Keys — VST3 sampler, solo
2025

Open-source · github.com/RaphaelPelerin/keys-gpt-vst

- Every knob, curve and meter of this C++ plugin's interface is **drawn by hand** with the JUCE Graphics API — no GUI library at all.

C++ · JUCE 8 · real-time DSP

EDUCATION

Epitech Technology
2022 — 2027 · Nice

Master's, Computer Engineering. Functional and object-oriented programming, Unix, assembly, systems and network programming. Specialisations in DevOps, AI, web/mobile and cybersecurity.

Beijing Jiaotong University
2025 — 2026 · Beijing

Fourth year abroad, software engineering, alongside Mandarin to HSK 3.

Lycée Simone Veil
2022 · Baccalaureate

Computer Science (NSI) and Mathematics.

CORE STACK

React · Angular · TypeScript · Node.js · PostgreSQL · Docker · Git · C++

ALSO WORKED WITH

WEB & MOBILE
React Native, Ionic, Expo, Tailwind, Vite

BACKEND
Express, FastAPI, Flask, Prisma, REST, SOAP/XML

AI & GENERATIVE
Python, PyTorch, diffusers/SDXL, ControlNet, LoRA, CUDA, OpenAI API, Anthropic Claude API, Gemini, TensorFlow

DATA & INFRASTRUCTURE
MongoDB, MySQL, GitLab CI

SYSTEMS & AUDIO
JUCE, real-time DSP, Unix, assembly, network programming

LANGUAGES

French	Native
English	Bilingual
Mandarin	HSK 3
Italian	Basic

INTERESTS

Skiing and taekwondo · motorsport · music production in a DAW, which is where the sampler came from · travel, most recently a year in Beijing.

Full driving licence.
