PROFILE

Fifth-year software engineering student at Epitech, back from a year at Beijing Jiaotong University. **Right now** I am leading the web client of Syntheza, a strategic-watch platform with real users, built with two teammates in other countries, and building Forge, a game-asset generator that runs SDXL offline on a single 8 GB GPU behind a FastAPI service. **I am looking for** a four-to-six month end-of-studies internship in **AI engineering from March 2027**: building and shipping the systems around a model — pipelines, APIs, evaluation and tooling — in a team I could join full-time afterwards.

PROJECTS

Syntheza — Lead Frontend Web
2025 — 2026
`syntheza.ovh · team of 3, three countries`

- Strategic-watch platform that ingests RSS at scale, **deduplicates** what it finds and returns a daily synthesis instead of another feed.
- I own the web client: interface, design system and the React component layer. Scope was set by a **field study of 20 professionals** before any code was written.

`React 19 · TypeScript · Tailwind · Radix UI · Node · Express · Prisma · PostgreSQL · React Native/Expo`

Forge — solo
2026
`github.com/RaphaelPelerin/forge-asset-generator`

- Game-asset generator running **SDXL and ControlNet on one local 8 GB GPU**, exposed over a FastAPI service so a pipeline can call it like any endpoint. Fully offline — no account, no image leaving the machine.
- Solved consistency with **recipes**: presets owning style, sampler and post-processing, so assets generated months apart still match.
- Measured where the model fails rather than prompting harder — the text encoder reads English only, so French subjects failed 6/6 until I added a local translation step. **~4,100 lines, 59 tests.**

`PyTorch · CUDA · diffusers/SDXL · ControlNet · LoRA · FastAPI · Pydantic · pytest · React`

Keys — VST3 sampler, solo
2025
`github.com/RaphaelPelerin/keys-gpt-vst`

- Single-sample VST3 instrument on JUCE: ADSR envelope, three-mode filter tracking that envelope, ping-pong looping across **16 voices**.
- Every knob, curve and meter drawn with the JUCE Graphics API — **no GUI library at all**.

`C++ · JUCE 8 · real-time DSP · IIR filters · Projucer`

Keys GPT — solo
2025 — 2026
`github.com/RaphaelPelerin/keys-gpt`

- Describe a part — mood, key, tempo, length — and get a playable piano roll and a downloadable MIDI file. Part type is **inferred from the prompt**, not picked from a menu.

`React · TypeScript · OpenAI API · Web Audio · MIDI`

EXPERIENCE

Appolonia — Front-end developer, intern
Apr — Aug 2025
`Casino floor management systems`

- Rebuilt the **KT Updater** module and built a group-management admin panel automating terminal shutdown and locking — software where a mistake takes a slot machine offline.
- Built an internal email-generation tool from scratch.

`Angular 13 · Ionic 6 · TypeScript · SOAP/XML APIs · GitLab`

ARD — Mobile development intern
2023

- Angular application managing **NFC cards** and user profiles for alarm systems, including card scanning to display cardholder information.

Intel · AI for Youth — competition
2022

- Computer vision and object recognition in Python with TensorFlow. **2nd place**, team category.

EDUCATION

Epitech Technology
`2022 — 2027 · Nice`
Master's, Computer Engineering. Functional and object-oriented programming, Unix, assembly, systems and network programming. Specialisations in DevOps, AI, web/mobile and cybersecurity.

Beijing Jiaotong University
`2025 — 2026 · Beijing`
Fourth year abroad, software engineering, alongside Mandarin to HSK 3.

Lycée Simone Veil
`2022 · Baccalaureate`
Computer Science (NSI) and Mathematics.

CORE STACK

PyTorch · Python · C++ · React · TypeScript · Node.js · Angular · PostgreSQL · Docker · Git

ALSO WORKED WITH

AI & GENERATIVE
diffusers/SDXL, ControlNet, LoRA, CUDA, OpenAI API, Anthropic Claude API, Gemini, TensorFlow

WEB & MOBILE
React Native, Ionic, Expo, Tailwind, Vite

BACKEND
Express, FastAPI, Flask, Prisma, REST, SOAP/XML

DATA & INFRASTRUCTURE
MongoDB, MySQL, GitLab CI

SYSTEMS & AUDIO
JUCE, real-time DSP, Unix, assembly, network programming

LANGUAGES

French	Native
English	Bilingual
Mandarin	HSK 3
Italian	Basic

INTERESTS

Skiing and taekwondo · motorsport · music production in a DAW, which is where the sampler came from · travel, most recently a year in Beijing.

Full driving licence.
